

FEATURED FAMILY

Declan and Conner Armstrong 1.5 years with AETC

“Surely this could not happen again.”

Brothers Declan and Conner attend our Murfreesboro clinic full-time. Declan was diagnosed with autism in May 2022. Because mom, Stephanie, and dad, James, knew what signs to look for, Conner was tested and diagnosed in December 2023.

Since coming to AETC, the family has seen incredible progress with both boys. Declan is spelling words and able to do math problems, while Conner is making progress with not climbing on things. He is also making progress in potty training.

“Even when you don’t see progress right away, it doesn’t mean it’s not happening. Patience with the process is key.”
